ARTWORK PREPARATION

The same front. Different edges.

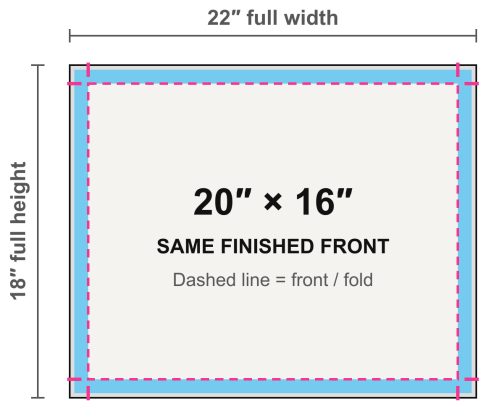

Measurements are width x height. Reference only; not printable artwork.

Example: **20 in wide x 16 in high** finished canvas. Order the front size, not the larger file size.

Slim: add 2 in to both front dimensions in total. Chunky: add 4 in to both. The 0.25 in rear allowance is already included.

Slim: 1″ artwork on every edge

For a 0.75″-deep frame

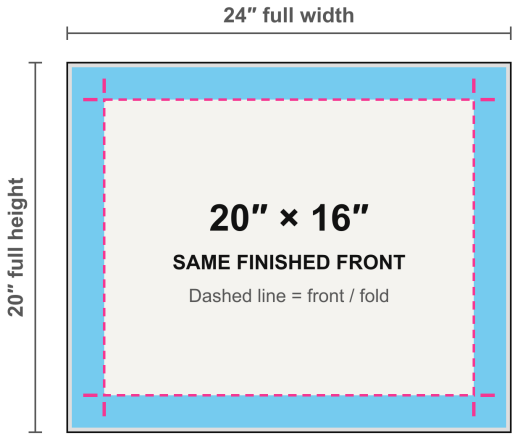

0.75″ sides + 0.25″ rear allowance

1″ per edge is already the complete allowance.

Guide marks explain the layout. Remove drawn marks.

Chunky: 2″ artwork on every edge

For a 1.75″-deep frame

1.75″ sides + 0.25″ rear allowance

2″ per edge is already the complete allowance.

Guide marks explain the layout. Remove drawn marks.

Reading the diagram

The pink dashed line marks the front fold. Blue is the side artwork; grey is the rear fixing allowance. Both diagrams retain the same finished front.

Use non-printing editor guides. Remove drawn lines, labels and corner marks from the final artwork. These diagrams explain measurements; they are not templates to print.

Normal photo orders

Upload the original/front photograph and use the creator's existing edge controls. A prepared full-wrap file needs clear workshop instructions; it is not detected automatically.

PIXEL REFERENCE

Physical size x PPI = pixels

Measurements are width x height. Reference only; not printable artwork.

Use the cropped front first. Add wrap only when preparing a complete file yourself.

PPI is image pixels per printed inch, often called DPI. A 300 PPI file has twice the pixels in each direction of a 150 PPI file at the same physical size. These figures do not assess the original photograph or guarantee sharpness.

EDITOR REFERENCE

Guide positions and final checks

Measurements are width x height. Reference only; not printable artwork.

For a **20 x 16 in front**, measure coordinates from the top-left of the full document. Guides mark boundaries between pixels.

Setup	Full file, pixels	Vertical x guides	Horizontal y guides
1 in edges / 300	6,600 x 5,400	300 and 6,300	300 and 5,100
1 in edges / 150	3,300 x 2,700	150 and 3,150	150 and 2,550
2 in edges / 300	7,200 x 6,000	600 and 6,600	600 and 5,400
2 in edges / 150	3,600 x 3,000	300 and 3,300	300 and 2,700

Prepare in this order

1. Keep the original; work on a copy.
2. Choose the front crop without stretching it.
3. Assess the pixels remaining after that crop.
4. Set the front size and chosen PPI deliberately.
5. Add 1 in or 2 in around every edge, centred.
6. Fill sides and corners; add front guides.
7. Save a master; export clean artwork.

Tell us what is in the file

Front: 20 x 16 in landscape.
Profile: 0.75 in Slim.
Allowance: 1 in already included per edge.
Full file: 22 x 18 in, 6,600 x 5,400 px.
Resolution: 300 PPI.
Sides: mirrored, image wrap or chosen colour.
Attach a separate annotated reference if useful.

Sending prepared wrap artwork: use the creator's Email option and send the file with order details to **sales@yourimage2canvas.co.uk**. Explain that it already contains its wrap. Contact us first if the preview cannot show the intended front correctly.
